WOOD CARPET

Is the American name for the article known in Europe as Parquetry, which means an ornamental hard-wood floor, that, by proper finish and care, will keep its color and figures, and lasts for generations. These goods have been introdnced and used about 12 years, and have become very popular, meeting a growing demand from wealthy people, and those whose tastes are cultivated by extensive travel in foreign land, where ornamental hard-wood floors (Parquetry) are, and ever have been universally and extensively used.

Wood Carpet, or American Parquetry.

Is not, as many people suppose, a temporary floor covering, to be laid down and taken up at pleasure, but is a permanent new floor on top of the old one, and is carefully fitted into all the offsets and runs around all the projections of the room, and is firmly nailed down with small brads; and when finished, has the effect of a thick European floor. We make it, however, in the same elaborate and beautiful design, by the process of gluing the woods on cloth, instead of to another piece of wood an inch or so thick, and we make it at a much less cost, as we utilize the floor already down, and thus occupy but one-quarter of an inch, instead of one inch or more (as with thick Parquet).

Where disappointments have arisen from any kind of Hard-Wood Floors, it has invariably been from not understanding the proper treatment, or in expecting too much from them. The treatment of our floors should be the same as the European.

The common remark, "that a bare floor is so cheerless," comes wholly from the impression given by an ordinary pine floor with its unsightly cracks, and from not having seen the effect of a well-laid Parquet floor, in combination with the furniture and other articles, in keeping with the character of the room in which it is laid.

WOOD CARPETING.

Standard Goods, are such as we keep regularly in stock; they are of a uniform thickness of one-quarter of an inch, composed of alternate strips of walnut and ash, or one kind of wood only, either oak, ash, cherry, maple or walnut. We make them of two widths, 36 and 28 inches, also plain borders, 6, 5 and 3½ inches wide, and walnut ribbon strips to form the mitre lines and fill in doors and small places. These woods are all kiln-dried in the most careful manner, and prepared so as to prevent shrinkage. Care must be taken to preserve them from dampness until the floor is laid and finished. The straight carpeting, 36 and 28 inches wide, rolls up like an oil-cloth, and is thus readily shipped. It weighs about seven pounds to the yard. One roll, or ten yards, occupies a space of about three cubic feet; the plain borders and walnut strips are twelve feet long, and make up into a solid package for shipping,

Fancy Borders are shown on Plate No. 6, and Centre Pieces, Plate No. 2, are always kept in stock; but Parquet Patterns are made to order, to suit the size and shape of the room for which designed.

RUGS.

Are being extensively used on account of their healthfulness, and convenience in keeping a room clean and free from dust. They are generally used on the middle part of the room, leaving a margin of about two feet around the sides of the room for the furniture to stand on. The floor upon which they lay should be a good one, with some degree of ornamentation, and free from joints and cracks. The dust on the border is easily removed with a damp cloth or brush, and the rug can be rolled up at pleasure, and taken out to be freed from dust. Rugs are now made to order at a very moderate cost, and of any desired size and shape.

BORDERS FOR RUGS.

Are made of Wood Carpet in an endless variety of patterns and prices, from 25 cents to $1.50 per square foot laid; and, for this purpose, they are the most suitable material ever made; as they are just the right thickness, and easily laid on any kind of a floor, filling up all the offsets, bay windows, &c., without interfering with the doors, and the edge of the rug is then not liable to trip the unaccustomed foot.

—The Highest Premium Awarded at the Centennial Exhibition.—

JOHN W. BOUGHTON

1118 Market Street, Philadelphia, Pa.

MANUFACTURER AND PROPRIETOR OF

Wood Carpet, Parquet Floors, Wainscoting

Used for Parlors, Dining, Bath and Sitting Rooms, Kitchens, Nurseries, Halls, Vestibules, Basements, &c., &c. Also, Used for Offices, Banks, Hospitals, Hotels, Drug and other Stores, Billiard Rooms, Dancing Halls, School Rooms, &c.

ANNOUNCEMENT.

I have engaged the services of E. C. HUSSEY, Architect, (of N. Y.) author of "Hussey's National Cottage Architecture," "Rural Art," and "Home Building," as

Artist and Designer in Parquetry.

Mr. HUSSEY is the originator and patentee of the thin Parquetry Floors known as Wood Carpet now so extensively used in this country. He was of the firm of Hussey & Whittemore, the first manufacturers of this line of goods, and afterwards organized into the National Wood Mfg. Co. of N. Y., of which he was the first President for years. As an artist and designer in this line of art and household decoration he has few equals and no superiors.

New, Fashionable and Unique Designs for Floors, Wainscoting, Walls and Ceilings

will be furnished on short notice, together with costs of making and furnishing the same, free of charge! The designs to be returned if not accepted.

WOOD CARPET

Is the American name for the article known in Europe as Parquetry, which means an ornamental hard-wood floor, that, by proper finish and care, will keep its color and figures, and lasts for generations. These goods have been introdnced and used about 12 years, and have become very popular, meeting a growing demand from wealthy people, and those whose tastes are cultivated by extensive travel in foreign land, where ornamental hard-wood floors (Parquetry) are, and ever have been universally and extensively used.

Wood Carpet, or American Parquetry.

Is not, as many people suppose, a temporary floor covering, to be laid down and taken up at pleasure, but is a permanent new floor on top of the old one, and is carefully fitted into all the offsets and runs around all the projections of the room, and is firmly nailed down with small brads; and when finished, has the effect of a thick European floor. We make it, however, in the same elaborate and beautiful design, by the process of gluing the woods on cloth, instead of to another piece of wood an inch or so thick, and we make it at a much less cost, as we utilize the floor already down, and thus occupy but one-quarter of an inch, instead of one inch or more (as with thick Parquet).

Where disappointments have arisen from any kind of Hard-Wood Floors, it has invariably been from not understanding the proper treatment, or in expecting too much from them. The treatment of our floors should be the same as the European.

The common remark, "that a bare floor is so cheerless," comes wholly from the impression given by an ordinary pine floor with its unsightly cracks, and from not having seen the effect of a well-laid Parquet floor, in combination with the furniture and other articles, in keeping with the character of the room in which it is laid.

WOOD CARPETING.

Standard Goods, are such as we keep regularly in stock; they are of a uniform thickness of one-quarter of an inch, composed of alternate strips of walnut and ash, or one kind of wood only, either oak, ash, cherry, maple or walnut. We make them of two widths, 36 and 28 inches, also plain borders, 6, 5 and 3½ inches wide, and walnut ribbon strips to form the mitre lines and fill in doors and small places. These woods are all kiln-dried in the most careful manner, and prepared so as to prevent shrinkage. Care must be taken to preserve them from dampness until the floor is laid and finished. The straight carpeting, 36 and 28 inches wide, rolls up like an oil-cloth, and is thus readily shipped. It weighs about seven pounds to the yard. One roll, or ten yards, occupies a space of about three cubic feet; the plain borders and walnut strips are twelve feet long, and make up into a solid package for shipping,

Fancy Borders are shown on Plate No. 6, and Centre Pieces, Plate No. 2, are always kept in stock; but Parquet Patterns are made to order, to suit the size and shape of the room for which designed.

RUGS.

Are being extensively used on account of their healthfulness, and convenience in keeping a room clean and free from dust. They are generally used on the middle part of the room, leaving a margin of about two feet around the sides of the room for the furniture to stand on. The floor upon which they lay should be a good one, with some degree of ornamentation, and free from joints and cracks. The dust on the border is easily removed with a damp cloth or brush, and the rug can be rolled up at pleasure, and taken out to be freed from dust. Rugs are now made to order at a very moderate cost, and of any desired size and shape.

BORDERS FOR RUGS.

Are made of Wood Carpet in an endless variety of patterns and prices, from 25 cents to $1.50 per square foot laid; and, for this purpose, they are the most suitable material ever made; as they are just the right thickness, and easily laid on any kind of a floor, filling up all the offsets, bay windows, &c., without interfering with the doors, and the edge of the rug is then not liable to trip the unaccustomed foot.

THE OBJECTION

To the general introduction of European Parquetry in this country is, that in laying it on the floor of a room of any finished house, it will raise that floor about an inch above the others, making it necessary to cut off the bottom of the doors, or else to take up and lower the old floor, so as to accommodate the thickness of the Parquetry floor. Another objection is, that like European furniture, these floors, as imported, will not stand our changeable climate and the furnace heat of our houses.

THE ADVANTAGES.

Of Parquetry wood floors over carpets are many; first, as being much more healthy; second, they are much easier to keep clean, and also, in the end, very much more economical than ordinary carpets, as they will last for a great many years.

It is Worthy of Notice,

That recent writers on Decorative Art and Household Taste recommend the general use of Wood Parquet Floors and Rugs as the most desirable way to furnish the floors of our homes, and attention is called to the recent articles in leading Magazines, notably Harper's and Scribner's.

These floors have been largely introduced in the most elegant and fashionable houses, as well as in many of less pretentions, in and about New York, Philadelphia, Boston, Chicago, St. Louis and other large cities and towns.

Floors are finished in Three Ways:

1st. By oiling as often as needed (at least once a month) with equal parts of linseed oil and benzine or turpentine. Apply with a rag, and wipe off as dry as possible.

2d. By putting on one coat of shellac with a brush, rubbing it down with sandpaper, and applying a second coat. Use the best white shellac.

3d. By waxing. This is the best known finish for floors. Use pure beeswax dissolved in turpentine over a slow fire. Apply while hot to the floor with a rag, rubbing it into the grain of the wood as much as possible. Let it stand over night, then polish with a heavy waxing brush. They should be brushed often to get a good polish.

To clean a waxed floor, wash off with turpentine. Floors finished in any other way should be scrubbed when dirty.

Price of waxing brushes, from $5.00 to $8.00.

ESTIMATES.

Free of charge for floors or borders, with full instructions and working drawing, will be cheerfully given to parties sending us a sketch of the ground plans, with measurements, of the spaces desired to be covered. State what class of room it is for, also if a cheap or ornamental floor is desired. Our floors vary from $1.50 to $18.00 per yard. It is better to say about how expensive a floor is desired, and the design will be made in accordance.

Our prices are for the goods uncut and measured before laid. The expense of laying and finishing is a separate charge: It is not possible for us to cut the goods here to fit any desired place. Any good carpenter or cabinet maker can lay our floors and make a good job from the working drawing and printed instructions.

Our floors are used in every class of house and in every kind of room; they are particularly suited for Dining Rooms and Kitchens, where food and grease are liable to get spilt. In Chambers they give a cool, cleanly floor, are insect proof, and allow the room to be swept out in a few minutes. A rug can be spread over it in cold weather.

THICK PARQUETRY FLOORS,

As used in Europe, are made in three ways: the first being simply tongue and grooved boards, laid diagonally or in other patterns; the second kind is made of pieces usually ⅞ of an inch thick, cut and fitted together in blocks, of any desired pattern, in sections usually 12 or 15 inches square; the third method is to make up the design required from lumber ¼ of an inch thick, glue the edges together, and then glue this pattern to a backing of hard wood. These are called *veneered* floors, and this is the style used in all elaborate designs, as it admits of a much greater variety of patterns than either of the other methods.

WE HAVE THE FACILITIES for making all of the above styles, as well as the thin floors of wood carpet, and of the newest and best designs, and shall be glad to furnish designs and estimates to any one desiring the same.

The designs made by this method are more artistic than those of the patented floors sold in this country, made by a western manufacturing company, in which tongue and grooved boards are inlaid at intervals with a wood of a different color. These inlays are no thicker than the wood carpet, and the method of making the floors allows but little range for elaborate graceful designs.

This method of making floors was tried by the original manufacturers of wood carpet, and thin Parquetry floors, 11 years ago, and after spending several thousand dollars in its manufacture and sale, was abandoned because it was more expense, not any more durable, and not susceptible of one-tenth the variety of designs into which wood carpet is readily worked.

The manufacturers, referred to above, speak of the wood carpet "as being largely sold a few years ago," but now gone out of use.

The facts are that the use of wood carpet and thin parquetry floors is growing as fast as we can increase the facilities for its manufacture, and people for whom floors were laid years ago, are getting thin parquetry floors to replace worn out carpets every year, and our largely increasing trade comes from people who have given the floors a thorough trial for years, and their acquaintances who know of them, and we seek the fullest investigation on this subject, and can give hundreds of references that will satisfy the most skeptical person of its durability and wearing qualities.

Architects and Builders

Are invited to examine these goods and their various applications. Diagrams and estimates will be cheerfully furnished at any time, free of charge, for Floors, Wainscoting, Ceilings, &c. A liberal commission will be allowed on all orders.

ARCHITECTS own designs made up to order.

Price List.

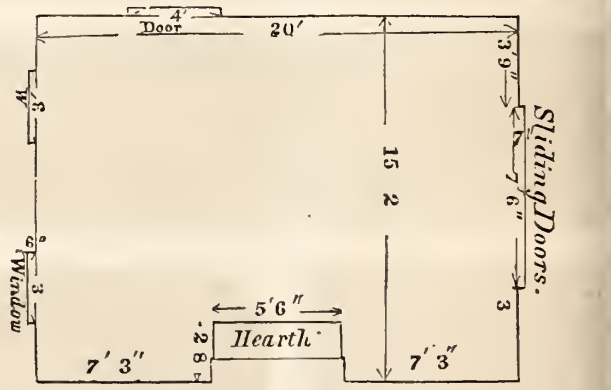
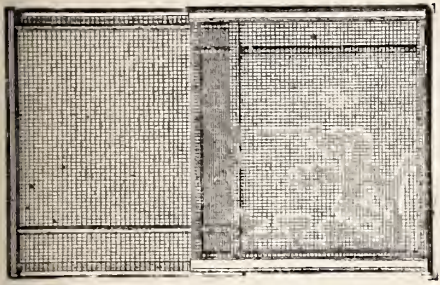
DIRECTIONS FOR MEASURING ROOMS.



Draw a plan of the shape of the room, showing all the doors, windows, recesses and length and projection of hearth-stone. (See Cut.) Give the full length of room, 20 feet; width, 15 feet 2 inches; length of hearth-stone, 5 feet 6 inches; projects from the wall line, 2 feet 8 inches; distance from hearthstone to end wall, 7 feet 3 inches; sliding doors, 7 feet 6 inches x 7 inches. Measure windows and doors, say 3 feet or 4 feet long, and they deflect 6 inches or whatever they may from the line of the baseboard.

BOUGHTON'S
MOSQUITO AND FLY SCREEN
WILL FIT ANY WINDOW.
Patented July 8th, 1873.



WINDOW SCREEN

The advantages of this Screen are;

1. It will fit any window, and is just suited to people living in rented houses.

2. It can be used in the different windows of the same house.

3. The wire screen is strong enough to keep children from falling out of the windows.

4. The netting on a frame can be easily replaced when worn out.

5. It is not necessary to take the screen out of a window to open or close the shutter.

PRICE LIST.

☞AGENTS WANTED.

J. W. BOUGHTON, Sole Proprietor and Manufacturer,

1118 Market Street, Philadelphia, Pa.

1211-13-15-17-19-21 & 23 NOBLE STREET.

Owing to rapidly increasing demand from all parts of the country for all goods of our manufacture, we have recently purchased the above property covering (7) seven lots, having a frontage of 126 feet on Noble St., and being 104 ft. deep, with a rear entrance from Hamilton St. We have put in a new 60 H. P. steam boiler of the most approved pattern, and a new engine. Have built large steam dry rooms and put in all the improved machinery necessary for making the best of goods in large quantities; and now have the largest and most complete manufactory of these goods in this country. Offices at store and manufactory connected by telephone.

We shall be pleased to give parties estimates and designs free of charge if they will furnish us with a rough sketch of the room they wish to cover, designating the style they prefer. If satisfactory, the goods can be ordered, or if not, the design must be returned to us or we will charge for it. When the goods are shipped, full printed instructions are sent with working drawings, so that any carpenter can lay them. They are portable and pack very close. Weight about 6 or 7 lbs. per yd. Its durability is equal to any hard-wood floor, and its hygienic properties are fully recognized and endorsed by the most eminent physicians of New York, Philadelphia, and other large cities.

The prices given on the various Plates are for the goods only The cost of laying will vary from 25 cents to 75 cents per yard, according to size, shape of plan, and finish. In this city it is better to get our price for the floor laid complete

For further particulars, address
